Davishankar Gaur

Security Engineer | Vulnerability Management | SOC | Offensive Security

Massachusetts, USA | +1-978-349-8671 | davishankar9822@gmail.com | Portfolio | LinkedIn | GitHub

Summary

Security engineer with 3 years at a SIEM/XDR vendor and an enterprise IT firm: remediated 30+ critical CVEs, handle SOC triage and incident response, and overhauled backup and disaster recovery for 20+ servers. Practicing offensive security in hands-on labs since 2021; NCAE Cyber Games regional winner, now completing OSCP+.

Certifications

AWS Certified Security – Specialty (SCS-C03) — Jan 2026
Associate of ISC2 (passed the CISSP exam) — Jun 2025
CompTIA Security+ (SY0-701) — Dec 2024
OffSec OSCP / OSCP+ (PEN-200) — *In progress – exam target Nov 2026*

Technical Skills

Security Tools:	Kali Linux, Burp Suite, Metasploit, Nmap, Wireshark, Gobuster/ffuf, sqlmap, Hydra, John the Ripper, Hashcat, Netcat, Impacket, Mimikatz, BloodHound, Qualys, CrowdStrike, Splunk, Netskope, Mimecast
Attack Techniques:	Web App Testing (OWASP Top 10), Privilege Escalation, Active Directory Attacks
Hands-on Labs:	OffSec PEN-200, PortSwigger Web Security Academy, TryHackMe, PentesterLab
SOC & Detection:	SIEM, SOAR, EDR, Incident Response, Log Analysis, Disaster Recovery
Vulnerability Mgmt:	Vulnerability Assessment, Patch Management, Container Image Hardening
Data Protection:	Data Loss Prevention (DLP), CASB, Email Security
Cloud & Network:	AWS (GuardDuty, CloudFormation), IAM, TCP/IP, DNS, TLS, Firewalls, IDS/IPS, VPN/IPSec
GRC & Compliance:	Risk Management, ISO 27001, NIST CSF, PCI DSS, HIPAA, GDPR, FedRAMP
Languages & Infra:	Python, Bash, PowerShell, SQL, Java, JavaScript, Docker, Linux, Windows, GitHub

Professional Experience

Seceon Inc. • *Member of Technical Staff* • Westford, MA — Feb 2026 – Present

- Remediated **30+ critical-severity CVEs** across multiple containerized company products, validating each fix with vulnerability rescans and regression testing in an isolated test environment before release.
- Building an automated remediation pipeline that patches, rescans, and verifies container stability end to end, replacing a manual per-CVE workflow.
- Overhauled backup and disaster recovery for **20+ servers**: wrote 2 new scripts and refactored 4 to automate secure daily backups, verified through restore testing.
- Managed on-site server setup at data centers, bringing new servers online for Seceon's infrastructure.
- Monitor and triage real-time SOC alerts, resolve incidents, escalate critical threats, and contribute to incident response workflows and playbooks.
- Implemented and maintained network monitoring for endpoint tracking, device fingerprinting, and system-utilization analysis, improving visibility and asset management.
- Work with cross-functional teams on customer onboarding and platform troubleshooting; test new features for bugs.

Seceon Inc. • *Cybersecurity Analyst Intern* • Westford, MA — Jun 2024 – Aug 2024

- Wrote 6 knowledge-base articles and designed chatbot integrations that resolved **50+ customer inquiries a week**, freeing up support staff.
- Built a RESTful API in Python and Flask to improve application performance and user experience.

Tavant Technologies • *Information Security Analyst* • Noida, India — Dec 2020 – Aug 2022

- Managed Qualys, CrowdStrike, Netskope, and Mimecast across **500+ endpoints**: ran vulnerability assessment scans and administered CASB policies, cutting vulnerability remediation time by **25%**.
- Coordinated ISO 27001 internal and external audits, closing with **zero major nonconformities**.
- Built Python-based automated reporting for compliance tracking, reducing audit preparation time by **25%**.
- Led a phishing-awareness program with IT and HR that trained 200+ employees and cut click-through by **18%**.

Symantec / Broadcom • *Undergraduate Intern* • Mumbai, India Jun 2019 – Jul 2019

- Completed 5 advanced Symantec cybersecurity certification courses in email security and data loss prevention.
- As the sole intern on the team, reviewed and updated outdated infrastructure documentation and policies, saving senior analysts **1.5 hours per week**.

Projects

Log4Shell Scanner (CVE-2021-44228) • 5-person team project

- Spearheaded design and implementation of a multithreaded, rate-limited scanner that injects JNDI payloads (LDAP, RMI, DNS, CORBA) into chosen GET/POST fields and headers, confirming hits via Burp Collaborator DNS callbacks.
- Added discovery of third-party servers referenced in a site's JavaScript and HTML; detected vulnerable setups that the widely used Fullhunt scanner missed, such as logins with renamed form fields.

Data Loss Prevention using Machine Learning • B.Tech thesis, VIT, 2020

- Built a PHP web application whose login form screens input with a Python Gradient Boosting classifier trained on SQL-injection payloads versus benign text, reaching **99% accuracy**.
- Hardened authentication with encrypted password storage, inactivity session timeouts, and a temporary lockout after 3 failed login attempts.

Malware Detection using Machine Learning • Course project, VIT, 2019

- Extracted PE-header, section-entropy, import/export, and resource features from malicious (VirusShare) and legitimate Windows executables with Python and pefile, keeping the strongest via Extra Trees selection.
- Compared Decision Tree and Random Forest classifiers in scikit-learn, reaching **90%+ detection accuracy**, and built a CLI that labels any executable as malicious or legitimate.

Awards

1st Place, NCAE Cyber Games • Northeast Regional

- Boston University team of 8 in a live cyber-defense and CTF competition; finished 5th of 90+ teams nationally.

Shining Star Award • Tavant Technologies Jun 2022

- Recognized for excellent contribution to the Information Security team.

Education

M.S. Computer Science (Cybersecurity), Boston University, Boston, MA 2023 – 2025

B.Tech. Computer Science & Engineering, Vellore Institute of Technology, Vellore, India 2016 – 2020
